Greenland | NATURAL • TEXTURED WALLCOVERINGS

Greenland Wallcoverings, based in Lu'An City, China, is the leading manufacturer of natural textured wallcoverings.

Our XPE functional product is a key part of our manufacturing business. Derived from the sugar cane plant, this biobased textile provides consumers with the same versatility, durability and high-performance results of similar textiles made from fossil fuels.

Sugar cane offers an environmentally conscious alternative to traditional materials. A rapidly renewable resource, it is one of the world's top crops in removing carbon dioxide from the atmosphere. The plant's ability to capture and store this greenhouse gas helps to reduce emissions and mitigate global warming.

With its versatile applications and ecologically minded construction, the XPE collection offers a host of features, advantages, and benefits for a diverse clientele.

Features

Our XPE products offer ...

- High-end designs on durable and long-lasting material free of manufacturing defects.
- Resistance to wear and tear in high traffic commercial areas.
- More than 200 standard colors for multiple classic and modern design choices.
- Easy maintenance.
- Top quality, resilient textures that resist abrasion and stains, and keep their color despite repeated cleanings.
- Five-year warranty for wallcovering applications.
- Flame retardancy with ASTM-E84 Class A standard.

Greenland | NATURAL • TEXTURED WALLCOVERINGS

Advantages

Our XPE products demonstrate …

- Versatility

Our XPE textiles fulfill different design needs in various environments, including academia, offices, hospitals, hotels and other commercial or residential locations.

- Adaptability

Our textiles can be used as wallcovering with options of nonwoven or paper backing, scrim substrate, or unbacked for upholstery, as well as for high-end interior furniture systems.

Benefits

Our XPE products are …

- Sustainable

Our wallcoverings are derived from the rapidly renewable sugar cane plant, which reduces greenhouse gases by removing carbon dioxide from the air.

- Environmental awareness

Our XPE line is manufactured without finishing, so is PVC and chlorine free.

- Health-conscious

Our XPE textured wallcoverings are antimicrobial and hypoallergenic.
